```
graph LR; subgraph CLIENT; VIEW["VIEW (SvelteKit)"]; end; subgraph SERVER; subgraph SERVER_BOX [SERVER]; MODEL["MODEL (struttura dati del sistema)"]; CONTROLLER["CONTROLLER (REST API)"]; MODEL -- "Cambia" --> CONTROLLER; CONTROLLER -- "Restituisce" --> MODEL; end; VIEW -- "Comunica" --> MODEL; CONTROLLER -- "Cambia/Rappresenta" --> VIEW; end;
```

The diagram illustrates the interaction between a Client and a Server. The Client contains a View (SvelteKit). The Server contains a Model (struttura dati del sistema) and a Controller (REST API). The View communicates with the Model. The Model and Controller interact: the Controller changes the Model, and the Model returns data to the Controller. The Controller then changes or represents the data back to the View.
